

Responsible Pet Education Program

St Paul's Primary School Gateshead was the very first school in NSW to participate in this new initiative by the Department of Local Government. On Monday 28.2.11 our Infants classes took part in the innovative program which conveys important messages about animal welfare, training, pet ownership and how to choose an appropriate pet. These safety messages were reinforced by the presence of Becky, a black Labrador, in the classroom. Becky was certainly a big hit with our youngest students.
