

Catholic Mission “Village Space” at St Pius X Adamstown.

Q: How to connect young people with local and global issues?

A: Be part of Catholic Mission's highly interactive presentation 'Village Space'.

On Wednesday 22 June, Year 8 students at St Pius X High School, Adamstown, entered the labyrinth – a pilgrimage, a sacred journey to the centre of themselves. As they walked the labyrinth, they met some amazing people from the Arctic North, Bangladesh, Kiribati, Australia, Brazil and Mexico. The dramatisation of each story enabled students to feel empathy with the characters and have a desire to stand in solidarity with them. It explored how climate change has become a driver of poverty, how the local people are responding and what we can do to support them.

Village Space complimented the Year 8 Religious Studies curriculum focus on social justice issues and the push of St Pius X for environmental sustainability and work with Catholic Earthcare Australia. 12 student volunteers from each audience were briefed and directly involved in each performance. Well done Catholic Mission on a timely, informative and engaging production!
